DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Claims 1-20 are allowed because the recited combination of elements of a device for automatically injecting liquids including an axially subdivided housing into at least two parts, connectable to each other, an ampoule in the second housing part, a driving pin that can be locked against a force accumulator, an injection needle within a guide that perforates the ampoule, an ampoule sleeve having radially inwardly protruding projections on an inner periphery of said sleeve, the needle guide having locking members connected to an ampoule sleeve whereby an axial displacement of the ampoule in a direction toward a needle guide while overcoming displacement resistance exerted by the projections causes release of the locking members and axial displaceability of the needle guide, a spring in the second housing part having a passage opening for the needle and the needle guide, and a sealing cap is not found nor fairly taught in the prior art of record, as argued by applicant and agreed to by examiner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
